

# NT Cutter Metal Precision Knife

## Dual End Holder

# D-1000P

NT Cutter's D-1000P dual end precision knife is a versatile three-in-one precision tool, combining an art knife, needlepoint, and burnisher in a lightweight aluminum body. Its durable design features a noncorrosive zinc chuck and nonslip nickel-plated brass collar to keep blades secure for precise control. Ideal for intricate work, the dual-end holder has a precision art blade on one end and a needlepoint on the other, perfect for weeding delicate adhesive lettering and handling sensitive materials in screen printing, lithography, and other detailed tasks. When not in use, both the blade and needlepoint store safely inside the holder, while the burnishers serve as protective end caps. Two burnishers—one rounded, one pointed—are included for smoothing and applying instant lettering, dry transfers, or other flat-surface materials, making the D-1000P a truly multifunctional precision knife.

### Features & Benefits

- Versatile three-in-one precision tool
- Art blade on one end and a needlepoint on the other
- Slim metallic 9mm diameter ergonomic body
- 2 burnishers serve as protective end caps
